

Job Title:	Junior Network Engineer
Department:	Network Architecture
Location:	Welshpool
Management responsibility	None

About ITS

We exist to ensure the UK has the best full fibre networks, to provide the best gigabit capable connectivity and broadband to UK businesses through our growing partner community. This enables opportunity, progress, exploration, creativity, innovation, and commerce. Rapidly advancing technology means there's never been a more exciting time; for you, for business, and for the future.

Role Headlines

As a Junior Network Engineer, you will play a vital role in supporting and maintaining our company's network infrastructure. You will work closely with senior engineers to monitor network performance, troubleshoot issues, and implement new network technologies. This is an excellent opportunity to gain hands-on experience and develop your skills in the field of network engineering.

Experience Required

About You

- **Passion for Technology:** You are genuinely enthusiastic about network technology and eager to learn and grow in this field.
- **Problem-Solving Skills:** You have strong analytical and problem-solving abilities and can troubleshoot network issues effectively.
- **Communication Skills:** You can communicate technical information clearly and concisely, both verbally and in writing.
- **Team Player:** You are a collaborative team player and can work effectively with colleagues at all levels.

Experience Required

- **Education:** A-levels or equivalent qualifications in a relevant field such as IT, Computer Science, or Mathematics. Recent graduates with a degree in a related field are also welcome.
- **Basic Networking Knowledge:** A foundational understanding of networking concepts such as TCP/IP, LAN/WAN, and network security.

- **Enthusiasm to Learn:** A willingness to learn new technologies and adapt to a fast-paced environment.

Experience Desirable

- **Prior IT Experience:** Any previous experience in IT, even in a non-networking role, would be beneficial.
- **Networking Certifications:** Any relevant networking certifications, such as CompTIA Network+, CCNA, JNCIA would be advantageous.
- **Scripting or Programming Skills:** Familiarity with scripting languages (e.g., Python, Bash)

Please note: This role is ideal for someone who is at the beginning of their career in network engineering. We will provide comprehensive guidance and support to help you develop your skills and knowledge.
